

wall maunted ENOMI FX

About

The minimalist, universal design of the Enomi FX series air conditioner will fit perfectly into any interior - it will work well in rooms with modern, as well as classic style.

A Modern contoured front panel with two decorative panels breaks the simple form of the device. The glossy surface of the housing and the hidden display LEDs emphasize its modern character.

The device uses the R32 refrigerant, has a silence mode, and a high energy class. In addition, it is distinguished by its small size (width is only 750mm) and the factory built IONIZER (COLD PLASMA). Available in capacities from 2.5kW to 7kW. The device has been equipped with a new wireless controller, the dimensions of outdoor units have been reduced, which makes it even more compact.

Main FX model Features

A++

ENERGY CLASS

Air conditioning units with an A++ rating are designed to use less energy compared to units with lower ratings, which can result in significant energy savings over time.

This is because they use advanced technology and features such as inverter compressors, which can adjust the speed of the compressor motor according to the cooling needs of the room, thereby reducing energy consumption.

ionizer

IONIZER

An ionizer air conditioning system is a type of air conditioning unit that includes an ionizer to improve indoor air quality. The ionizer works by releasing negative ions into the air, which attach themselves to positive ions such as dust, pollen, and other pollutants.

As a result, these pollutants become heavier and are attracted to surfaces such as walls, floors, and furniture, making them easier to remove through regular cleaning. In addition, the negative ions can also help to neutralize odors and reduce the presence of bacteria and viruses in the air.

75 CM

SPACE SAVING

A 75 cm wide air conditioner is much narrower than the average air conditioning unit, making it an ideal choice for those who have limited space in their home or office.

This unit can be installed on a wall or a window, saving valuable floor space. suscipit lobortis nisl ut aliquip ex ea commodo consequat.

Honeycomb filter

HONEYCOMB FILTER

Type of air filter that is commonly used in air conditioning systems. The filter is made up of layers of paper or synthetic material that are arranged in a honeycomb pattern, which provides a large surface area for air to pass through.

Honeycomb filter can provide several advantages for those who are looking to improve indoor air quality and reduce energy consumption.

INTELLIGENT WIFI FUNCTION

Create the ideal comfort conditions in your space from a distance using wifi control with your hand-held device.

Enable the app on your device and connect to the wireless Internet at your space to control the function you want.

SILENT OPERATION

Due to the high efficiency DC Inverter Compressor and DC Fan Motor, ENOMI airconditioners can operate as low as 19 dB, which is quieter than a library. The combination of the air tunnel optimization technology, big diameter fan and high efficiency DC Fan motor contributes to a better air distribution and air flow for indoor unit with noise as low as 19dB, providing you with a comfortable sleeping environment.
